

POLAR TEAM PRO

POLAR TEAM PRO APP AND WEB SERVICE

The Polar Team Pro app and web service are your ultimate tools for monitoring and evaluating training sessions. Team Pro analytic tools allow teams to minimize the risk of overuse injuries, improve athletic performance and win games. Adding Polar wrist units can give coaches and athletes a deeper insight to how daily activity and sleep impacts recovery and performance.

Analyze Everything

Analyze everything on the go or after training, and keep your team on the right track.

- Follow up to 60 players in real time
- Get team and player training summaries
- Gain deeper insight on a training session by breaking it down into phases
- Heat map analysis for player location on field
- Long term reports for both team and individual players
- Acute to chronic ratio reports for internal and external load scores
- Player comparison
- Support for coaching multiple teams
- Export session data straight to Excel
- Add Polar wrist units to optimize training, performance, sleep, and recovery based on 24/7 holistic feedback

Upgrade Your Game

Get your yearly subscription for Polar Team Pro app and web service

- Single subscription for the entire organization
- Unlimited teams and unlimited athletes
